MONTANA LABOR MARKET

Monthly Review of
EMPLOYMENT OUTLOOK, LABOR SUPPLY, LABOR DEMAND, CURRENT EMPLOYMENT

MONTANA STATE EMPLOYMENT SERVICE Division of Unemployment Compensation Commission of Montana

Albert F. Root, Commissioner

Chadwick H. Smith, Chairman
Mitchell Building — P. O. Box 1728 — Helena, Montana

Paul R. McClure, Commissioner

FL-164

OCTOBER, 1956

170,000 Level Surpassed Third Successive Month

Wage earners in Montana exceeded 170,000 in September, the third successive month in that bracket. Only in two months prior to this year had 170,000 been reached on Montana payrolls—August and September of last year. Preliminary estimate for September is 170,400, more by 400 than that of September, 1955. Revised figure for August boosts that month to 172,000, or 600 above that of the preceding August, the previous record high level of wage earners in Montana.

Government Payrolls Up

Gains in September employment over a year earlier included 100 in manufacturing, 300 in finance, insurance and real estate, and 1,100 in government operations. Declines were 500 in construction total, 400 in mining, 100 in transportation and utilities, and 100 in finance and insurance. Trade held exactly even with a year ago, though wholesale trade gained 400 and retail trade lost a similar number of workers.

Utilities Use 500 More

Specific industries within the major divisions show notable variations in several instances. Employment by utilities rose 500 above a year ago, with truck, bus, and airplane operations in transportation adding another 100. At the same time interstate railroad employment declined 700. Railroad employment is in process of adjustment to new motive power, which consumes less labor.

Forest, Parks, Postal Crews Larger

Increases in government employment are shown as 400 in federal payrolls, divided about equally between forest and parks, and postoffice department; and 700 in state and local, occurring principally in state general staffs and in county educational forces.

Metal Mines Have 8,500

Metal mining employment in September, at 8,500 was 400 above that of a year ago, but quarrying and coal mining offset this in part by declining 200 while petroleum and natural gas production was down 600, more than taking up the balance.

Construction Sags Slightly

Building contractor employment was down 200 from September, 1955. Contractors on dams, pipelines, highways and other non-building jobs receded 600, and a 300 gain in special trade contractor employment made up part of the sag in construction.

September 1,600 Below August

September's deficit of 1,600 in total employment from August reflects the effect of student withdrawal from working force and return to the classroom, supplemented by the beginning of seasonal action in the lumber industry, and continuing scarcity of hardrock miners, which makes even replacement hiring difficult.

SCATTERED SHORTAGE OF BUILDING LABOR AS SCHOOL WORKERS RETURN TO CLASSES

Employment demands in the Montana labor market continued at mid-summer high level through September, accentuated by the withdrawal of several thousand school and college people for work in the classrooms. No acute shortages of workers developed, though building trades craftsmen were in scarce supply throughout the state, demand for more hardrock miners was unabated, and experienced clerical workers were being sought in most office areas.

Sawmill and Woods Employment Eases Off

Slackening demand for lumber, and consequent weakening of the price structure, produced an easing off in sawmill and woods employment, with a probable effect of advancing the time of seasonal layoff in those activities to an earlier date than usual. The lull comes at a time when lumber and logging employment was at its highest level of the year and for several years. Reduced home-building programs throughout the area reached by Montana lumber products is ascribed as a principal reason for the declining lumber demand.

Work-Applicant Count in Review

	1956	1955	1954	1953	1952	1951
February	13,061	12,304	12,455	10,995	10,136	12,336

October	3,500*	3,348	4,038	2,688	1,955	2,572
December		9,351	8,613	7,932	7,517	6,694

*Estimated.

More Jobseekers Than in August

Jobseekers at the end of September reported by offices of the employment service remained at approximately the August level, 2,889 in September, 2,808 at the end of August, a rise of less than three percent. In terms of the working force, this represents unemployment of about one and one-third percent, which is near the barrel-bottom in usual employment experience. A year ago the late September jobseeker count was 2,781, about 100 below this year's supply.

Replacement Demand in Construction

Construction was a principal factor in maintaining employment demand through September, mostly for replacement rather than in the form of force expansion. At the close of the month crews at the Noxon Rapids dam in western Montana were on the decline from the August peak of 1,000, partly due to completion of preliminary contract phases of the project. The Glasgow airbase construction was about at its peak at 600, with layoffs expected to develop with coming of cold weather. Billings, Great Falls, Bozeman, Missoula, and Butte were centers of construction activity, with substantial programs also in progress at most of the other principal state centers.

Winter Jobs May Increase

Reports from a number of the areas indicate prospect for more winter employment in building construction than has prevailed during recent winters. Many commercial and residence structures were reported as reaching the enclosed stage during the fall months, with inside finishing to be pressed during the winter. At the Noxon and Glasgow projects the bulk of the employment is on outdoor work.

Highway Oiling Wanes

Highway construction has about reached the end of its oil surfacing season, and the state system will carry over some projects for finishing next summer. Employment on building and repairing the state highways was about 350 below the August level, but was 130 above that of a year ago. September figures were 1,129 by contractors, 853 on maintenance, against 1,489 and 835 in August. A year ago it was 992 and 851.

New Road Contracts Let

Work was in progress on 340 miles of highway construction, and on 14 bridges to cost \$2,850,000. Jobs contracted but not under way covered 71 miles of road and bridges at \$1,559,000. The highway completions in September comprised 168 miles of roadway and three small bridges.

Sugar Plants and Christmas Trees

Hiring of sugar refinery crews at four state plants was completed by early October, for season runs of from 60 to 120 days. About 1,200 jobs are involved. Timbered areas of the state report early hiring of Christmas tree cutters and prospect of strong but brief demand for yard workers to handle and ship the harvested trees. Much of that work is performed by persons not ordinarily in the labor market, drawn from households and farms.

Tourist traffic sustained its normal seasonal decline with the opening of schools, and employment in trade and service establishments receded in customary fashion. This slack will be taken up as holiday expansion of sales crews and fall demand for mechanics and repair men develop.

Along the Hiring Line— Field Summary Oct. 1

ANACONDA Deer Lodge Philipsburg— (54 jobseekers; 20 men, 34 women; 9 men and 4 women over 45). An expected expansion in smelter employment has not developed, no present demand for additional workers. Construction on a road job and store building continues, most residential projects already completed. Potato harvest has begun, utilizing mechanical pickers and using fewer human hands than in past.

BILLINGS, Columbus, Hardin, Hysham, Laurel, Red Lodge, Roundup— (536 jobseekers; 303 men, 233 women; 91 men and 61 women over 45). Over 600 new job applicants listed in September, 660 in August. In-migration continues but is slightly abated. New construction projects include a court house, telephone building addition, loan office, and two shopping centers, along with sustained activity in home building. Railroads have further reduced their crews—20 maintenance of way and 50 round-house employees released—in transforming to new motive power. Two sugar refineries opened early in October for two-month campaign.

BOZEMAN, Ennis, Three Forks, Trident— (147 jobseekers; 80 men, 67 women; 9 men and 6 women over 45). Vegetable canneries has ended its season, retaining small warehouse crew. Work on new field house and college building addition progressing, latter near completion, field house nearly enclosed. New high school walls up, roof begun, will be enclosed for winter work. Two road jobs finishing and another nearly done, one started late in September. Construction men scarce.

BUTTE, Virginia City, Whitehall— (269 jobseekers; 144 men, 125 women; 61 men and 24 women over 45). Shortage of miner applicants continues, lack of housing contributes to recruitment lag. Several hundred miners who left for summer employment expected back in late fall. Two additional pit-mine shafts to be sunk, one in January, another start in March. Building construction employment is brisk, current shortage of carpenters, glaziers, and plumbers. New apartment house, railroad station, and office building to start soon.

CUT BANK— (45 jobseekers; 30 men, 15 women; 5 men and 5 women over 45). Construction less than a year ago, though most building skills are in short supply. Some replacements used, as students returned to classrooms. Four or more road projects expected to start soon, new motel to be built in Glacier park. Oil activity slowing down in employment.

DILLON— (34 jobseekers; 23 men, 11 women; 12 men and 3 women over 45). Harvest nearly completed, releasing mi-

Employment—

	Sept. 1956	Aug. 1956	Sept. 1955	Sept. Avg. 1950-1955
Industrial Employment	170,400	172,000	170,000	159,400
New Job Applicants	3,020	3,250	2,539	2,520
Job Applicants, End of Month	2,889	2,808	2,781	2,506

Insured Employment—

	Oct. 5 1956	Sept. 7 1956	Oct. 7 1955	Avg. 1st Oct. Wk. 1950-1955
New and Renewal Claims	274	171	291	258
Unemployed Weeks Filed	717	685	854	980
Total Unemployment Claims	971	856	1,145	1,238

grant labor. Of 40 mile railroad spur to phosphate beds 15 miles are completed, 80 men on the job. Tungsten prospect north of Dillon employs 20 men. A mill for handling gold-bearing ore is being reactivated and will use crew of 15. Retail store closing, releases 6 workers.

GLASGOW, Fort Peck, Malta, Opheim— (56 jobseekers; 35 men, 21 women; 7 men and 5 women over 45). Construction employment continues at high level, with 600 on new airbase projects, 15 residences, and an office building. Concrete work will continue most of October, but crews will be trimmed as cold weather intervenes. Most road jobs in area completed and farm work is at the end of its season.

GLENDIVE, Circle, Wibaux— (32 jobseekers; 18 men, 14 women; 3 men and 4 women over 45). Shortage of carpenters, welders and building labor expected in October. Pipe line to Pine Unit field begun, a gas installation there about complete but other developments starting. Shrinkage in tourist traffic reflecting in reduced crews in trade and service establishments.

GREAT FALLS, Choteau, Fort Benton, Stanford— (355 jobseekers; 197 men, 158 women; 60 men and 49 women over 45). Less labor supply than in August, but no shortage except of building craftsmen. Construction program includes street paving over most of city, curbing and sewer replacements, new dam for power plant, airbase buildings, and runways, business and residence building. All fully manned except the dam, which is in preliminary stage. Considerable in-migration noted. Smelter hiring of replacements finds ample supply available.

HAMILTON, Stevensville— (149 jobseekers; 83 men, 66 women; 18 men and 13 women over 45). Increased labor supply results from poor crop year on farms, decrease in construction volume, and receding market for lumber and wood products. Only shortages are for plumbers, electricians, and auto mechanics. Beet harvest begun, Christmas tree harvest will start about October 15.

HAVRE, Chinook, Harlem— (52 jobseekers; 22 men, 30 women; 6 men and 3 women over 45). Transients scarce, and few new entrants to labor market. Increased construction demand in sight. Railroad used extra repair crew in September. Farm harvest completed. Present employment level expected to continue through October and until cold weather halts outdoor work.

HELENA, Boulder, Garrison, Townsend, White Sulphur Springs— (138 jobseekers; 93 men, 45 women; 40 men and 14 women over 45). Construction continuing, with several projects nearing completion. Carpenters, and other building skills, scarce, along with stenographic help. Laundry plant re-opened in September, calling 45 back to their jobs. Harvest of potato crop helped by 50 Indians. New dormitory and auditorium being built at Boulder, will be finished early in 1957.

KALISPELL, Columbia Falls, Eureka, Libby, Whitefish— (300 jobseekers; 191 men, 109 women; 54 men and 20 women over 45). Construction employment maintains its high summer level, with occasional shortages of building skills. Decline in tourist trade has reacted on employment in trade and service. Receding lumber demand and price level is slowing the logging and sawmill employment and may hasten seasonal layoffs. Christmas tree harvest begins in October.

LEWISTOWN, Harlowton, Ryegate, Winnett— (60 jobseekers; 20 men, 40 women; 8 men and 11 women over 45). Labor demand was stronger in September. The gas pipeline is under construction, road jobs are being pushed for completion, one store building is already finished and another more than half done. Work at the gypsum plant was cut from three shifts to two, but most of those displaced were absorbed in other sections of the enterprise.

LIVINGSTON, Big Timber— (36 jobseekers; 24 men, 12 women; 7 men and 5 women over 45). Construction employment active through September, with work on Yellowstone Park project in full swing and the railroad shop reconversion erecting new forms for new structures. Finish carpenters

EIGHT YEARS OF MONTANA INDUSTRIAL EMPLOYMENT TOTALS, BY MONTHS (in Thousands)

Along the Hiring Line— Field Summary Oct. 1

(Continued from previous page)
are in demand, also building labor. The park work will cease with severe weather, railroad project hopes to continue into winter. Logging at full scale to provide winter supply of timber for sawmills.

MILES CITY, Baker, Broadus, Ekalaka, Colstrip, Forsyth, Jordan, Terry—(90 jobseekers; 52 men, 38 women; 16 men and 6 women over 45). Labor demand strengthened in September with a start on several new projects in the Miles City area. Bridge contract employs 20 men and is one-fourth complete. Skilled men are scarce.

MISSOULA, Drummond, Arlee, Superior—(322 jobseekers; 183 men, 139 women; 36 men and 25 women over 45). Full crews continue in logging and sawmills, though weakening demand may bring cut-backs. Plumbers and fitters scarce as gas installations continue. Demand for teamsters, carpenters, and building labor is declining. New prospects include three bridges, a new bank building. Two business buildings in process with full crews. Sugar plant opened in October, crew of 260, for 60 day run. Christmas tree harvest starting.

POLSON—(92 jobseekers; 62 men, 30 women; 19 men and 14 women over 45). Farmers are seeking winter employment, adding to work-applicant list. Road job at St. Ignatius finished, new project held up by right of way, will start next spring. Lumber and plywood price lag has idled about 30 in local plants for undetermined period.

SHELBY, Chester, Conrad—(17 jobseekers; 6 men, 11 women; 4 men and 4 women over 45). High level employment into October, with full crews on grain elevator and on road jobs, street improvement winding up. Residence and commercial buildings are reaching the enclosed stage, permitting inside work as winter approaches. Labor supply still dependent upon clearance and transients.

SIDNEY—(22 jobseekers; 11 men and 11 women; 5 men and 2 women over 45). Carpenters in demand through September; new power plant, lodge hall, new homes and warehouse under way. Short of 12 truck drivers with trucks on road project. Work halted on the armory, lack of materials. Sugar refinery started in early October with crew of 250, may operate through January.

THOMPSON FALLS, Hot Springs—(40 jobseekers; 20 men, 20 women; 11 men and 7 women over 45). Construction demand brisk in early September, tapered later. Some force reduction in prospect at the Noxon dam as early phases reach completion. Seasonal maximum of employment passed on that project, will decline as cold weather develops. Lumber employment continuing in face of reduced demand and price levels of the product. Some operators expect early layoffs in the woods.

WOLF POINT, Plentywood, Scobey—(43 jobseekers; 25 men, 18 women; 4 men and 7 women over 45). Little change in employment field through September. New projects include an office building, school addition, overpass and residences; two schools and a road job finishing; work continues on two churches, sewer and water installations, telephone lines, and a school building. Most buildings will soon be enclosed, furnishing inside work in cold weather.

ESTIMATED EMPLOYMENT IN NON-AGRICULTURAL INDUSTRIES IN MONTANA (1)
